SL25

2.5T Mobile Midrise Scissor Lift

This 2.5T Mobile Midrise Scissor Lift is ideal in situations where you need a quick vehicle lifting solution and doesn't have time to complete the groundwork or where you're unable to due to building regulations.

Unlike a traditional lift, you'll be able to move the SL25 straight into your new workshop and get to work!

It is important to remember that with portability can come extra danger, but Atlas has addressed this with several intuitive safety features. A decent alarm provides warning to all in your workshop when the lift is in operation. An electric release ensures no matter what happens the vehicles on your lift remains safe.

Lifting Capacity 2500kg

Lifting Height 960mm

Min Height 105mm

Lifting Time 30s

Lowering Time 30s

Optional Power Supply 220v (1ph)

Motor Power 2.2kw
